

MARINA UTILITIES – WATER, SEWER, ELECTRIC, FIRE PROTECTION

OCEAN CLUB MARINA AT PORT CANAVERAL

PROJECT DESCRIPTION: The Ocean Club Marina at Port Canaveral is a newly completed redevelopment by Port Canaveral Marine Center, LLC, a subsidiary of Dream Harbors LLC of Naples, FL. The Ocean Club Marina features a 7,200-square foot clubhouse, swimming pool, tiki bar and 73 boat slips to accommodate vessels from 40 feet up to 110 feet long. The berths are technologically advanced Bellingham floating concrete docks with full services including: Individual telephone, water and electric hookup at each slip, Cable TV, and High-Speed Internet, as well as individual pump out at each slip.

Marina Utilities provided marina systems – water, sewer and fire protection for this all new deepwater marina. In-slip pump-out is a convenience for the slip holder and is also a valuable water and environmental protection, eligible for grant application through state and federal sources. www.oceanclub-pc.com
