

MARINA UTILITIES – WATER, SEWER, ELECTRIC, FIRE PROTECTION

PALM HARBOR MARINA

PROJECT DESCRIPTION: Palm Harbor Marina, a deep water mega-yacht marina that is a major refurbishment to an existing marina, is in West Palm Beach, on the Flagler waterfront directly overlooking the West Palm Beach and Palm Beach waterfronts. Marina Utilities is providing marina utilities - water, sewer and fire protection for Palm Harbor. The \$20 million dollar marina, with megayacht slips from 60 to 250 feet, advanced MarineTek floating concrete docking systems, 3 phase powers systems, 24 hour security, concierge services, clubhouse, lounge, fitness center, recreation room, laundry and showers is a Public Private partnership with Chase Enterprises, Leisure Resorts LLC and the City of West Palm Beach. This marina project has the first MarineTek docking system in the US – the docking system is constructed in ready-made 65 foot lengths, dramatically cutting assembly time and installation time by length and by providing in-trough utilities for ease of installation. <http://www.palmharbor-marina.com>
